PREFACE

This book contains a compendium of protocols currently in use in our *Drosophila* and nanotoxicity research laboratory of Meerut Institute of Engineering & Technology, Meerut. Some of these methods did not originate in this laboratory, but were obtained from other groups and are presented with little or no modification. We hope that by collecting them in one volume, we will be providing a useful service to other *Drosophila* biologists and nanobiotechnologist groups. We would be grateful for any corrections or suggested modifications to the protocols. Please feel free to communicate us for any error and recommend this book as you wish.
